

Khalid Mustafa

Age: 11

Hometown: Mumbai, India

Family: his parents and
older sister

*"Scientists are the architects of tomorrow,
forging groundbreaking discoveries that shape
the world for generations to come."*

Goals

- To be a groundbreaking scientist.
- Master experiments and studies.
- Enjoy chess and history books.

Frustrations

- Complex explanations.
- Need for more advanced challenges.
- Lack of real-world examples.

Khalid Mustafa, 11, from Mumbai, India, is a budding scientist who dreams of changing the world. He conducts experiments, loves chess, and history books.
