

Khalid Mustafa

SAYS

- "I want to become a groundbreaking scientist and change the world."
- "I love conducting experiments and learning from them."
- "Chess is a fun game that challenges my mind."
- "I enjoy reading history books and learning about the past."

THINKS

- "How can I make a significant scientific discovery that impacts the world?"
- "I need to master experiments and study in depth to achieve my goal."
- "Chess and history books are my escapes and provide mental stimulation."
- "I wish there were more advanced challenges to keep me engaged and learning."

DOES

- Khalid actively conducts experiments and takes notes to learn from them.
- He plays chess regularly and may participate in chess clubs or competitions.
- Khalid seeks out challenging science and math problems online or from books.
- He may express frustration when faced with complex explanations

FEELS

- Khalid is driven and passionate about his goal of becoming a groundbreaking scientist.
- He finds joy and fulfillment in conducting experiments and exploring the unknown.
- Chess and history books bring him happiness and intellectual stimulation.
- He can feel a bit impatient when not presented with advanced challenges.
